This data file was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS), by Synectics for Management Decisions, Inc. (Synectics), Arlington, Virginia. Data collection was performed by Mathematica Policy Research (Mathematica), Princeton, New Jersey.

Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Study Respondents

Unauthorized disclosure of identifiable information violates the pledge given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law.

Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for reidentification of specific study respondents.

- To make no use of the identity of any study respondents discovered inadvertently and to report any such discovery to SAMHSA (SAMHSA_support@smdi.com).

Public Domain Notice

All material appearing in this report is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without the specific, written authorization of the Office of Communications, SAMHSA, U.S. Department of Health and Human Services.

Data Citation

Data users agree to reference the following citation in any of the publications that use these public use data.

Substance Abuse and Mental Health Services Administration, *National Mental Health Services Survey (N-MHSS): 2015. Data on Mental Health Treatment Facilities*. BHSIS Series S-69, HHS Publication No. (SMA) 16-4949. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2015.

Authors of publications that use these data are required to send citations of their published works to SAMHSA for inclusion in a database of related publications (SAMHSA_support@smdi.com).

Disclaimer

Data users acknowledge that SAMHSA and SMDI (Synectics) will bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

Violations

If SAMHSA or SMDI determines that this “Terms of Use” agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

Description of the National Mental Health Services Survey (N-MHSS)

The 2015 National Mental Health Services Survey (N-MHSS) was conducted from April 2015 through January 2015. The N-MHSS collects information from all known facilities¹ in the United States, both public and private, that provide mental health treatment services to people with mental illness. The Center for Behavioral Health Statistics and Quality (CBHSQ) of the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs the N-MHSS.

The N-MHSS provides the mechanism for quantifying the dynamic character and composition of the mental health treatment delivery system. It is the only source of national and state-level data on the mental health services delivery system reported by both publicly-operated and privately-operated specialty mental health care facilities. The N-MHSS is designed to collect data on the location, characteristics, and utilization of organized mental health treatment service providers (for facilities within the scope of the survey) throughout the 50 states, the District of Columbia, and the U.S. territories.² The N-MHSS complements, but does not duplicate, the information collected through SAMHSA's survey of substance abuse treatment facilities, the National Survey of Substance Abuse Treatment Services (N-SSATS).

The objective of the N-MHSS is to collect data that can be used for multiple purposes:

- To assist SAMHSA and state and local governments in assessing the nature and extent of services provided in state-funded, state-operated, and private non-profit and for-profit mental health treatment facilities, and in forecasting mental health treatment resource requirements;
- To update SAMHSA's Inventory of Behavioral Health Services (I-BHS), an inventory of all known mental health and substance abuse treatment facilities in the United States, which can be used as a frame for future surveys of these facilities;
- To describe the nature and scope of mental health treatment services and conduct comparative analyses for the nation and states; and
- To update the information in the mental health component of SAMHSA's online Behavioral Health Treatment Services Locator, which includes a searchable database of some licensed and accredited public and private facilities for the provision of mental health treatment. The Locator is available at <https://findtreatment.samhsa.gov>.

¹ Entities responding to the N-MHSS are referred to as "facilities." *Survey coverage* provides definitions of the types of mental health treatment facilities included in the N-MHSS.

² In the 2015 N-MHSS, the territories included American Samoa, Guam, Puerto Rico, and the U.S. Virgin Islands

Data Collection Procedures for the 2015 N-MHSS

Field period

The field period for the 2015 N-MHSS, which included mailing and data collection operations, ran from April 30, 2015, through January 19, 2016.

Survey universe

The 2015 N-MHSS survey universe included 17,486 facilities across the United States and its jurisdictions. Most facilities in the 2015 N-MHSS frame were identified from the updated database produced after fielding the 2010, 2012, and 2014 N-MHSS, supplemented by the 2015 mental health augmentation and new facilities that states requested be added to the I-BHS.

Below are the major activities undertaken to make sure SAMHSA has the most complete universe of facilities:

- The updated survey database is comprised of (1) those facilities that were included in the previous survey and are in-scope, and (2) newly identified facilities that became known during the course of the previous survey and are identified as eligible. Facilities that closed or were subsequently found to be out-of-scope are excluded.
- State mental health authorities (SMHAs) are contacted annually and asked to either (1) update and edit their state listing of known facilities or (2) submit a new state listing of known facilities, using an online, password-protected site called the Inventory of Behavioral Health Services (I-BHS) that has been used by the state substance abuse agencies (SSAs) for a number of years. The information collected through these state listings is processed and cross-checked with the database of facilities in the I-BHS; newly identified facilities are screened for eligibility before being added to the survey database.
- Augmentation includes a number of activities undertaken by our contractor staff. Contact is made on an annual basis to obtain current facility listings from the American Business Index (ABI), the American Hospital Association (AHA), the U.S. Department of Veterans Affairs (VA), the Centers for Medicare and Medicaid Services (CMS), and a number of national behavioral health organizations/associations, such as the National Council for Community Behavioral Healthcare, the National Association of Psychiatric Health Systems, and the American Association of Children's Residential Centers (AACRC). These listings are cross-checked against the existing I-BHS database and any new facilities are screened (through an augmentation screener questionnaire conducted through phone interview) for eligibility to be included in the database for the upcoming survey. The augmentation screener is also used to screen facilities that were newly identified through the previous survey and through the state listings.

When new eligible facilities are identified between surveys, they are contacted by way of a "between survey update" telephone interview to provide basic facility information. They can then be added to SAMHSA's online Behavioral Health Treatment Services Locator at <https://findtreatment.samhsa.gov/> instead of waiting an additional year for the next survey.

Survey coverage

The following types of mental health treatment facilities were included in the 2015 N-MHSS:

- *Psychiatric hospitals*—Facilities licensed and operated as state/public psychiatric hospitals or as state-licensed private psychiatric hospitals that primarily provide 24-hour inpatient care to persons with mental illness. They may also provide 24-hour residential care and/or less than 24-hour care (i.e., outpatient, partial hospitalization), but these additional service settings are not requirements.
- *General hospitals with a separate inpatient psychiatric unit*—Licensed general hospitals (public or private) that provide inpatient mental health services in separate psychiatric units. These units must have specifically allocated staff and space for the treatment of persons with mental illness. The units may be located in the hospital itself or in a separate building that is owned by the hospital.
- *Veterans Administration (VA) medical centers*—Facilities operated by the U.S. Department of Veterans Affairs, including general hospitals with separate psychiatric inpatient units, residential treatment programs, and/or psychiatric outpatient clinics.
- *Partial hospitalization/day treatment mental health facilities*—Facilities that provide only partial day mental health services to ambulatory clients, typically in sessions of three or more hours on a regular schedule. A psychiatrist generally assumes the medical responsibility for all clients and/or for the direction of their mental health treatment.
- *Outpatient mental health facilities*—Facilities that provide only outpatient mental health services to ambulatory clients, typically for less than three hours at a single visit. A psychiatrist generally assumes the medical responsibility for all clients and/or for the direction of their mental health treatment.
- *Residential treatment centers (RTC) for children*—Facilities not licensed as psychiatric hospitals that primarily provide individually-planned programs of mental health treatment in a residential care setting for children under age 18. (Some RTCs for children may also treat young adults.) RTCs for children must have a clinical program that is directed by a psychiatrist, psychologist, social worker, or psychiatric nurse who has a master's or doctoral degree. To qualify as an RTC, the primary reason for admission of more than half of the clients must be mental illness or emotional disturbance that can be classified by DSM-III/DSM-III-R, DSM-IV/DSM-IV-TR, DSM-V, or ICD-9-CM/ICD-10-CM codes, other than codes for intellectual disability, developmental disorders, and substance use disorders.
- *Residential treatment centers (RTC) for adults*—Facilities not licensed as psychiatric hospitals that primarily provide individually-planned programs of mental health treatment in a residential care setting for adults.

- *Multi-setting mental health facilities*³ (*non-hospital residential plus outpatient and/or day treatment/partial hospitalization*)—Facilities that provide mental health services in two or more service settings (residential and outpatient and/or day treatment/partial hospitalization) and are not classified as a psychiatric hospital, general hospital, medical center, or residential treatment center.
- *Community mental health center (CMHC)*—Facilities that either (1) provide outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of its mental health service area who have been discharged from inpatient treatment at a mental health facility; (2) provide 24-hour emergency care services; (3) provide day treatment or other partial hospitalization services, or psychosocial rehabilitation services; (4) provide screening for patients being considered for admission to state mental health facilities to determine the appropriateness of the admission; and (5) meet applicable licensing or certification requirements for CMHCs in the state in which it is located.
- *Other type of residential treatment facility*—Facilities not licensed as a psychiatric hospital, whose primary purpose is to provide individually-planned programs of mental health treatment services in a residential care setting and is not specifically for children only or adults only.
- *Other* refers to another type of hospital or mental health facility not defined in the categories above.

Exclusions

The 2015 N-MHSS survey universe excluded: (1) Department of Defense (DOD) military treatment facilities, (2) individual private practitioners or small group practices not licensed as a mental health clinic or center, and (3) jails or prisons. Also mental health facilities that closed since the previous survey are excluded from the survey.⁴

Content

The 2015 N-MHSS survey instrument was a 6-page document with 26 numbered questions (Appendix A). Topics included:

- Facility type, operation, and primary treatment focus
- Facility treatment characteristics (e.g., service settings; mental health treatment approaches; supportive services/practices; special programs offered; and crisis intervention team availability).

³ The classification of psychiatric hospital, general hospital, medical center, or residential treatment center—any of which can offer mental health services in two or more service settings—takes precedence over a multi-setting classification.

⁴Facilities are not eligible for inclusion in the survey universe if they provide any of these following services only or in combination: crisis intervention services, psychosocial rehabilitation, cognitive rehabilitation, intake, referral, mental health evaluation, health promotion, psycho-educational services, transportation services, respite services, consumer-run/peer support services, housing services, and legal advocacy. Residential facilities whose primary function is not to provide specialty mental health treatment services are also not eligible for inclusion in the N-MHSS survey universe.

- Facility operating characteristics (e.g., age groups accepted; services provided in non-English languages; and smoking policy)
- Facility management characteristics (e.g., licensure, certification, and accreditation; standard operating procedures; and sources of payment and funding)

Data collection

Three data collection modes were employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a computer-assisted telephone interview (CATI). Approximately three weeks before the survey launch date (April 30, 2015), an advance letter from SAMHSA was mailed to the attention of the facility directors of all eligible facilities to alert them to expect the survey and to request their participation in the N-MHSS (Appendix B). The letter also served to update records with new address information received from the U.S. Postal Service. A data collection packet (including the questionnaire, SAMHSA cover letter, definition package, state-specific letter of support, information on completing the survey on the web, fact sheet of Frequently Asked Questions, and postage-paid business-reply envelope) was mailed to each facility in July 2015. The web-based survey also became available in May.

Each facility had the option of completing the paper questionnaire and returning it by mail or completing the questionnaire via the secure survey website.

During the data collection phase, contract personnel were available by telephone to answer facilities' questions concerning the survey. Web-based support for facilities completing the questionnaire on the web was also available. Multiple reminder letters were sent to non-respondents over the course of the data collection period via fax, mail, and email. To increase the survey response rate, state mental health agency representatives were contacted during the data collection period to inform them of their state's progress and to request additional help in encouraging responses. Blaise[®]-to-web follow-up of non-respondents began in August 2015 and ended in late January 2016.

Eligibility and unit response rate

Table 1.1 presents a summary of eligibility and response rate information. Of the 17,486 mental health treatment facilities in the survey, 16.7 percent were found to be ineligible for the survey because they did not provide mental health treatment services, had a primary treatment focus of substance abuse services or general health care, provided treatment for incarcerated persons only (i.e., in jails or prisons), or were an individual or small group mental health practice not licensed or certified as a mental health center or clinic.

Table 1.1. N-MHSS facilities, by status and mode of response: 2015

	Number	Percent
Total facilities in survey	17,486	100.0
Closed/ineligible	2,913	16.7
Eligible	14,573	83.3
Total eligible	14,573	100.0
Non-respondents	1,185	8.1
Respondents	13,388	91.9
Excluded from report	562	4.2
Administrative only	555	4.1
Out-of-scope facilities	7	0.1
Eligible for report	12,826	87.7
Mode of response	12,826	100.0
Internet	10,315	80.4
Mail	535	4.2
Telephone	1,976	15.4

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Mental Health Services Survey (N-MHSS), 2015.

Ninety-two percent of the 14,573 eligible facilities completed the survey, including 555 facilities that provided administrative services only. Four-fifths of the respondents that were eligible for the report (80.4 percent) completed the survey on the web, 15.4 percent on the telephone, and 4.2 percent through the mail.

Facility Reporting and Selection for the 2015 N-MHSS Report

Of the 14,573 eligible facilities in the survey, 13,388 (91.9 percent) completed the survey. The facility respondents included 555 facilities that provided administrative services only, and an additional 7 facilities that were later identified as being out-of-scope; these two groups of facilities are excluded from this report. The excluded facilities and reasons for exclusion fell into two categories:

- (1) A total of 555 administrative-only facilities were excluded. These facilities are included in SAMHSA's online Behavioral Health Treatment Services Locator; however, given that these facilities did not provide direct mental health treatment services, they were considered out-of-scope for this report.
- (2) A review of the facilities that reported their facility type and operation as "Other" found that 7 facilities were out-of-scope, and were subsequently excluded from the analysis in this report.

After the exclusion of the 562 out-of-scope facilities, data from 12,826 eligible respondent facilities were included in this 2015 N-MHSS report.

Quality Assurance

All mail questionnaires underwent a manual review for consistency and missing data. Calls to

facilities clarified questionable responses and obtained missing data. After data entry, automated quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing plus consistency checks not readily identified by manual review. The web-based questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses on critical items. The CATI questionnaire was similarly programmed.

Response Rates

The final unit response rate for eligible facilities was 91.9 percent. Extensive follow-up during data collection and careful editing maximized item response; the item response rates averaged approximately 97.9 percent across all 144 separate items.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2015 N-MHSS. Some general issues are listed below. Considerations and limitations of specific data items are discussed where the data are presented.

- The N-MHSS is a voluntary survey and while every effort is made to obtain responses from all known mental health treatment facilities, some facilities did not respond. There was no adjustment for the 8.1 percent facility non-response.
- When possible, we used cold-deck imputation to fill in item non-response. This is a technique that uses historical information from previous surveys to supplement the current data. In the N-MHSS, missing values were imputed using survey data collected in 2014.
- Multiple responses were allowed for certain questionnaire items (e.g., services provided in non-English languages and type of payment or insurance accepted for mental health treatment services). Tabulations of data for these items include the total number of facilities reporting each response category.
